

BUILD YOUR OWN PYRAMID

1. Print this template out and stick it to a piece of light card like a cereal box.
2. Cut the template out around the solid lines.
3. Score lightly along the dotted lines with a ruler and scissors or craft knife.
4. Fold along the dotted lines so that the square base is on the table and the triangles are standing up
5. Fold the shaded areas back on themselves and use double sided tape or glue to stick them to the adjacent triangle.
6. Paint with yellow paint or, if you have it, you could use sandpaper or glue and a sprinkling of sand to make it more realistic!
